PROFILE

Data Science undergraduate with a strong foundation in Python, programming, data analysis, and problem solving. Interested in Data Science, Artificial Intelligence, Machine Learning, and software development. Currently building practical projects using Python, web technologies, and data-driven approaches, with a long-term goal of developing strong industry and engineering skills.

EDUCATION

B.Tech – Computer Science and Engineering (Data Science) 2025 – 2029

Ballari Institute of Technology Management, Ballari, Karnataka, India

Pre-University / Class XII 2023 – 2025

Sri Masters Junior College, Anantapur, Anadhra pradesh, India

TECHNICAL SKILLS

Programming	Python, C, Java
Data Science	NumPy, Pandas, Data Analysis, Data Visualization, Machine Learning Fundamentals
Computer Vision	OpenCV, Image Processing
Tools	Jupyter Notebook, Google Colab, VS Code, Git, GitHub
Database	MySQL, SQLite
Core Concepts	Data Structures and Algorithms, Problem Solving

PROJECTS

Hospital Management System Python, HTML, CSS, JavaScript

- Developed a web-based hospital management system for managing patient and appointment-related information.
- Designed the frontend using HTML, CSS and JavaScript with a Python-based backend.
- Implemented appointment booking functionality and structured data management for hospital operations.

Hotel Room Management System C

- Developed a console-based hotel room management system using C to manage room availability, customer details, and bookings.
- Implemented core operations such as room booking, room availability checking, customer record management, and checkout using functions and structured programming.

Interactive Quiz Application Python

- Developed a Python-based quiz application that presents multiple-choice questions and evaluates user responses automatically.
- Implemented score calculation, answer validation, and result display to provide an interactive quiz experience.

EXPERIENCE

Student / Academic Projects 2025 – Present

- Built programming and data science projects as part of academic coursework and independent learning.
- Worked with Python, C, Java, NumPy, OpenCV, web technologies and GitHub while developing practical applications.

CURRENT LEARNING

Python for Data Science — Data Structures and Algorithms — Web Development — Git & GitHub

ACHIEVEMENTS

- Participated in academic projects, technical activities and programming-based learning.
- Developing skills in Data Science, Artificial Intelligence, programming and software development.

AREAS OF INTEREST

Data Science — Artificial Intelligence — Machine Learning — Data Structures — Software Development
